NO IDEA IN THE BRITISH MINISTRY OF SHOCK-ING THE UNITED STATES GOVERNMENT.

BY THE COMMERCIAL CABLE TO THE HERALD. I The Henaun's European edition publishes to-day the following, dated

LONDON, Jan. 17, 1891.—Rumors are affeat of a somewhat forcible remonstrance having been addressed by Mr. Blaine to Lord Salisbury on account of the proceedings being taken to the Supreme Court, but nothing seems to be known about it in official circles. If such a despatch has been received Lord Sallsbury is keeping it to himself until Tuesday next, when there will be a Cabinet meeting to arrange the course of business for Parliament.

The government is in a position, I understand, to dispose quickly of any charge brought against it of a desire to steal a march ou the United States in the Behring Sea negotiations or of treating the Sceretary of State with discourtesy.

Those who are acquainted with the facts are confident that when the people on both sides of the Atlantic hear the truth they will see that the British Ministry could not have acted otherwise than it has done. It will be denied altogother that Lord Salisbury originated or suggested the application to the Supreme Court. The proceedings were taken on the responsibility and initiative of Canada, the Ministry here concurring, and not imagining for a moment that the United States government would place an offensive construction upon them.

It is maintained that an appeal to the highest American court for the settlement of the points of law involved in the international dispute shows the utmost confidence in that court, and therefore cannot reasonably be regarded as an act of discourtesy toward the President or his advisers. It is also well known here that the proceedings in question were originally sugcested months ago by an American lawver of high standing, Mr. Sydney Webster. Officials here are prepared to show that they have greater confidence in the impartiality and indemendence of the Supreme Court than is entertained by the Secretary of State.

The question will no doubt be brought before Parliament as soin as the papers are laid on the table. I may say that among all parties there asing every meas of closing this controversy isbury deserves general support. There will plications in Irish affairs. therefore be no stack upon the Ministry from have noted with perfect good faith and could not have foresee that a willingness to submit their case to the diudication of a purely Amercan tribonal word be regarded as an insult by Mr. Blaine.

There is distinct disappointment over the defec-tive character of his statement regarding the composition of the lymph, especially the studied reticence concerning some parts of the process of production. Experts in analysis say that his declaration that the remedy is a glycerine extract "Aus den Re-noulturen der Tuberkel Baciden," reveals

declaration that the remedy is a glycerine extract "Am den Remedituren der Tuberkel Baciden," reveals nothing, while the description of the lymph which follows, which says the lymph contains "eine genese Menge con Mineral Sanen, fürbende Substanzen und endere unbekannte Extractivios" sooms purposely evasive and obscure. The discussion proceeds with renewed activity as to the value of the discovery. The weight of German, Austrian and English medical opinion supports the belief in the healing virtues of the lymph.

Professor Virchow is understood to have modified his unfavorable view. Professor Fraenkel has exhibited before the Berlin Medical Society six cases of pulmonic tuberculosis and lupus, all of which are distinctly progressing toward a cure. He also reports the cases of fifty-two patients taken at the first stages of disease, most of whom are recovering. Professor Fraenkel is averse to treating patients in advanced stages of disease.

Professor Sonneburg reports favorably on the cases of several patients in the Moabit Hospital who were suffering with advanced phthisis.

Dr. Rosenthal, of the Berlin Dermatology Sociale, upholds the supreme value of the lymph in cases of lapus. A debate in this society elicited the opinion from several ductors who favor the use of the lymph in leprosy. Doctors in Stuttgart report its successful use in scrotulous diseases of the eye.

Advices from Vienna state that the physicians there praise Professor Roch's genius as an observer. They are surprised at the simplicity of the discovery.

It is acknowledged that they there against the abuses of landlordism may be said to have surrendered after being unmercifully beaten by the enemy. The completeness of the victory gained by landlordism may be judged from the fact that all the stores in New Tipperary and all the stalls in the former business thoroughfare known as O'Brien's Arcade, with the exception of three, are either permanently closed or in hands of the bailiffs, the latter having seized them for debt.

The past has been the coldest week of the season. On Monday the Seine was fairly frozen over. Huge floes of ice were welded together and for miles the river was a solid mass of ice, a scene not witnessed since 1879. At Neuilly the HERALD correspondent crossed on the ice. It was very rough, with dangerous places be-The Heraun's European edition publishes to-day tween the floes. Several hundred boys and the following from its correspondent: men crossed. The next day came a partial thaw, and frost and thaw have alternated ever since. Thursday came snow, Friday frost, with a keen wind.

The booths, which by the special permission of the President, at the request of Mme. Carnot, were kept open a week later than usual, are gone and the Paris streets have once more resumed their natural appearance. Just now is the season of public balls, and the one at the opera was a grand success and crowded to overflowing. It inaugurated the series and during the next few weeks Bohemian Paris dances to its heart's content. Society has been busy, the events of the week being the grand dinner of Baroness Alphonse de Rothschild and the pink ball given by Mme, de Montbrisson,

IN THE RIVIERA. Generally speaking, society is beginning to leave Paris for Nice and Cannes. The great feature of the Riviera is the races at Nice. The Grand Prix de Monte Carlo was the most popular victory, being won by Galantin, belonging

to that best of sportsmen, the Comte de Nicolai.

Mr. Henry Ridgway drove the "Meteor" coach from Cannes on to the course with the Princess de Sagan and her party on the roof. The Princess was dressed in gray and black velvet and vied with Mme. de Montgomery. The Due de Chartres was in attendance. Soon after came the "Comet," driven by Sir Allen Mackenzie, by whose side was the Princess Hatzieldt, née Huntington. On the roof were Prince Hatzfeldt, Comte and Comtesse de Suzannet, Comte Schweim, Mr. and Mrs. Van Loon and Major Neeld, while Bellamy blew sweet strains on the horn. Another couch had the three Misses Chambers, Miss Somerset, Mrs. Taylor, Mr. and Mrs. Brook and Baron de Richewurt. Count de Zeulen wheeled his four state that Mme. Marie Van Zandt is enjoying a good looking horses into place and handed | most pleasant and prosperous season in the moddown Mme. Marino. Miss Potter, Comte Masseliere and M. Marino were also of the party.

Among those present were Colonel Fi zgeorge, Sir Rivers Wilson, Comte de Juigné, Comte de Nicolay, Prince de Rohan, Prince Dhuleep Singh, Prince Poniatowski, Viscomte de Janzé. Comte de Boisgelin, Foxball Keene, Oliver Iselin, Clarence Dinsmore-in fact, everybody was there. Pau keeps up its run of gavety, though the snow and frost have stopped the hunting. The restaurant lately added to the English Club has proved a great success, and a large number of members dine there nightly. A PARIS DOCTOR TAKES LYMPH.

A good deal of interest is excited in Paris by the case of Dr. Jules Soller, who, just when Koch's revelations are published, is suffering severe after effects from being inoculated with the lymph. He went to Berlin early in December to study the action and effects of the Kochine. Although not suffering from any illness he underwent the inoculation, and on his return to Paris was taken violently ill. The symptoms were severe headache and backache. somnolence and entire loss of memory. After his return from Berlin he went to a funeral, transacted business of importance and had long conversations, but cannot remember anything about them. Three doctors attended him, but could make nothing of the case. He was kept rigidly in a dark room, and after a fortnight in bed Dr. Soller is just recovering, but expresses strong doubts of Koch's remedy.

CABLE LETTER FROM PARIS.

AMERICAN PORK IN FRANCE-THE TWO CENTRAL AMERICAN CANALS.

INY CABLE TO THE HERALD.

Paris, Jan. 17, 1891,—American pork has been the subject of much discussion in the Tariff Committee of the Chamber of Deputies. It seems to be generally understood that the committee will recommend the abrogation of the decree prohibiting the importation of American pork. If this is adopted American pork will be placed upon the same footing as the product of other countries. In fixing the new duties on park to be recom-mended by the committee there was considerable variety of opinion on the part of the various members. M. Vigers, reporter of the committee, said to-day that three members of the committee had advocated making a single tariff rate for all forms of pork of 20f. per 100 kilograms. This plan, however, did not find favor with the committee. After much deliberation it was decided to make two classes of pork products, with different rates for each class. In the first class are placed ham, bacon and salted pork, and the duty proposed on these is from 18f. to 20f. per 100 kilograms, according to quality. In the second class are included all forms of pork products known as charcuterie fubriquee, and the duty proposed is from 18f. to 25f. per 100 kilograms.

M. Cluseret, Deputy from the Department of the Var, has taken a leading part in the efforts to settle this question. In conversation with the correspondent of the Associated Press to-day M. Cluseret said:-"I have been doing everything in my power to get my colleagues to understand the principle and workings of the new American tariff so far as it affects French interests. I have had numerous conversations with my fellow members in which I have endeavored to explain this matter to them. At the same time I have urged that the decree prohibiting the importation of American pork ought to be rescinded. I have sought to convince them of what I consider an undoubted fact, that the prohibition was in its origin only a sop to Germany. I think this clear because we never shut out German pork." M. Cluseret expressed the opinion that the question would be settled as aiready outlined. The report submitted by M. Viger, he said, presupposed that the decree against American pork could be abrogated. Many of his colleagues, he knew, believed that the proposed duties would afford ample protection to French in

THE RIVAL CANALS. M. Monchicourt, the liquidator of the Panama Canal Company, in an interview in regard to the proposal that the United States government should guarantee the interest on the Nicaragua Canal Company's bonds, said that the Panama Canal would be finished before the Nicaragua was com-

pleted. He added:—

I am doing everything possible to hand over the affairs to the new company. I once hoped that the United States government would assist in the work of completing the Panama Canal. I was instrumental in having the Panama Canal. I was instrumental in having the Cabinet at Washington and the American Legation in this city sounded upon the subject, but. I am sorry to say, without offact. I then proposed that the Panama Railroad Company, practically an American concern, should entarge its capital stock so as to embrace in its Board of Directors representatives of the Panama Canal Company. Here again, I am sorry to add, the Panama Railroad Company's Board of Directors kindly but positively declined to entertain any of the propositions I made to them.

There is no possible doubt that the government of France ought to promptly assume charge of the Panama Canal and make the necessary arrangements to complete the work.

Canal and make the necessary arrangements to complete the work.

I am certain that if the French government felt that it would not suffer a humilisting robust from the government of the United States, the former government would be only too willing to make propositions to the United States which might lead to a mutual and satisfactory understanding by which the Fanama Canal can be completed. Americans will readily admit that it is much more practical for the Congress of the United States to spend money on a canal which is nearly half completed than to spend money upon a project which is scarcely started.

STARVING IN ALGERIA.

THE INHABITANTS OF THE VILLAGE OF SEBDON SNOWED IN WITHOUT FOOD.

IBY CABLE TO THE HERALD. ALGERES, Jan. 17, 1891.—It would seem that upless a miracle happens or the weather changes radi cally within a very short time the inhabitants of Sebdon, a small town in the Tiemcen district of the province of Oran, will starve to death. About a week ago information reached the city of Tlemcen to the effect that the inhabitants of Sebdon were snowed up beyond escape and that they were slowly starving to death. Their stock of provisions had run out before the bearer of the alarming news reached Tiemcen, and it was said that the horses, mules and even the few camels at Sebdon were being killed for food. As in the majority of small Algerine towns the inhabitants of Sebdon depended almost entirely upon the regular or irregular con vo s of provisions which reach them from the larger towns, and the stock kept on hand is always comparatively small.

When the news of the dangerous position in which the inhabitants of Sebdon were placed reached the military authorities of Tiemcen they immediately sent a quantity of provisions under the escort of a detachment of troops from the gar. rison of Tlemcen to the relief of the sufferers at Sebdon. Unhappily the convoy, a day or so later, was snowed up in the Talterney Pass, and it was some time before the authorities at Tlemcen became aware of the danger to which the convoy was exposed. An additional force of troops was then sent out from Tlemcen with Instructions to push on at all hazards to the relief of the snowed up troops, and afterward, if possible, to assist the convoy in pushing on to Sebdon. The second detachment of troops managed to reach Talterney Pass, and on January 15 it was announced that the tion and that the road over which they were passing was then open to travel.

This doubtless must have referred only to the route between Tlemcen and Talterney Pass, for to-day information was received here to the effect that the attempt to provision Sebdon had failed, that the district was hopelessly snowed up and that the troops were continuing their efforts to open up a line of communication with Sebdon.

open up a line of communication with Sebdon. Grave apprehensions are felt as to the eventual fate of the inhabitants of the snowed up town.

The French-African troops, accustomed to the burning heat of the African summer, and utterly unaccustomed to such severely cold winters as the one they are now experiencing, make but poor headway in fighting their way through the snow toward Sebdon. The troops themselves are suffering terribly from the cold. Their clothing, camp equipage and small tanks abri are unfitted for the bitterly cold work of practically digging mile upon mile through the snow toward Sebdon. Then, agair, the high winds which have been prevailing greatly hinder the work of the troops, raising huge heaps of drift snow in places the soidlers have previously cleared. This greatly discourages the men. The troops also suffer from lack of fuel.

THIRTY THOUSAND TRADES UNIONISTS IN LINE IN EDINBURGH.

[BY CABLE TO THE HERALD.] EDINBURGH, Jan. 17, 1891.—A monster procession of trades unionists, estimated to have been composed of about thirty thousand men, marched through the streets of this city to-day. This display of Edinburgh's workmen was a demonstration in sympathy with the railroad employes who are out on strike. The processionists behaved in the most orderly manner, and were enthusiastically cheered by tens of thousands of persons who lined the streets along the line of march. The different trade divisions were headed by brass bands, bagpipes or fife and drum corps, while banners bear ing such mottoes as "No Surrender," "Fight for Your Rights," "Fair Pay for a Fair Day's Work" were carried above the heads of the marching trades unionists. There seems to be no prospect to-day of an early termination of Scotlaud's great railroad strike. This is the end of the fourth week of the trouble.
